ZS-00361 SERIES

ONE PART M12 PROXIMITY SENSOR

Description:

Environment-proof self-contained proximity sensor enclosed in a rugged hermetically sealed ceramic/stainless steel housing, designed to meet the requirements of ground mobile and naval applications.

Operation by the Eddy Current Killed Oscillator (ECKO) principle, which is used to detect metallic objects passing in front of the sensing face. Once a target metal is detected, a trigger signal is produced which is then passed through the output conditioning circuitry to give a high or low output, depending on the sensor application.

Features :

- All metal sensing
- Small size M12 housing
- Integral VG95328 connector
- High level of electronics protection

Typical Applications :

- Ship gun controls
- Door and hatch open/closed monitoring
- Aircraft carrier landing platforms
