Figure 2 Zero Temperature Dependence

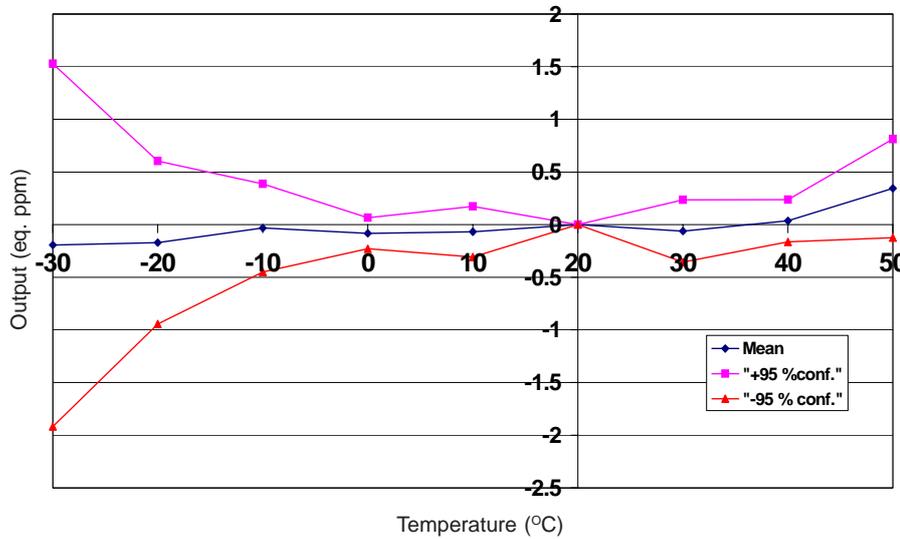

Figure 2 shows the variation in the zero current caused by changes in temperature.

This data is taken from a typical batch of sensors. The mean and $\pm 95\%$ confidence intervals are shown.

Figure 3 Batch Repeatability

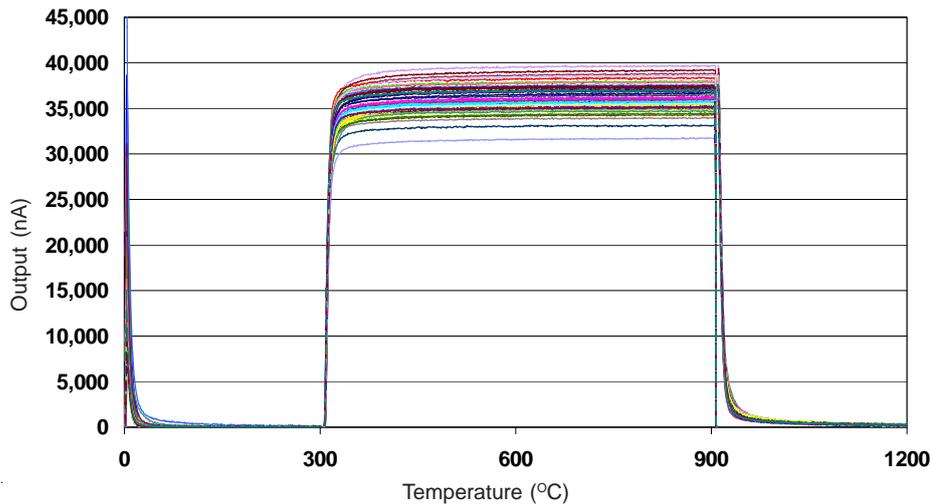

Figure 3 shows the response to 400ppm H₂S for an entire batch. Repeatabile zero, fast response and stable output show good process control

This data is taken from a typical batch of sensors.

Figure 4 Response to 1% H₂S

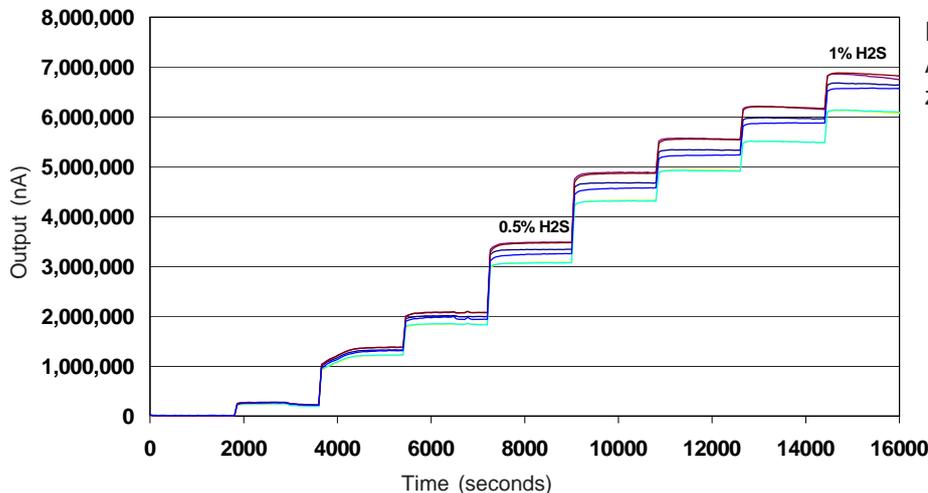

Figure 4 shows that the H₂S-AE has stable response from zero to 1% H₂S.
